

■ Remotis Products

Remotis is an ISV with a series of services management products, including Remotis iSMS and iMonitor, available as virtual or physical appliances and SaaS solutions hosted at our world-class Remotis Operations Center.

■ Proven IT Services Expertise

Remotis' professional IT services expertise includes fortune-grade public companies to government entities and encompasses a broad range of infrastructure hardware and software solutions based on commercial and open source platforms. Our operating system experience traverses all major platforms from Windows and Linux variants to AIX, HP-UX, Solaris, System i, and System z. From storage, networking, and server support to business continuity, virtualization, web development, directory services, messaging, and collaboration technologies, Remotis is your total solutions partner.

■ Strategic Partnerships

Remotis has strategic relationships with respected hardware and software vendors including Cisco, HP, IBM, Novell, and partners via our Remotis Affiliate Network.
